

# Online Faculty Development program on Digital Academic Delivery

**Disadvantages**

- **Quality/reliability concerns** – some online material can be edited by anyone at anytime, which results in irrelevant or inaccurate information
- **Limitation of copyright property protection** – OER licenses change "All rights reserved." into "Some rights reserved.", so that content creators must be careful about what materials they make available.
- **Technology issues** – some students may have difficulty accessing online resources because of slow internet connection, or may not have access to the software required to use the materials.
